

let in the
fresh air

Get fresh air into the cab – even during bad weather – with Venta-lators® and Ventshades from Belmor

Stale air in the cab can make drivers drowsy and fog windows. Belmor has the solution – Venta-lators and Ventshades specially designed for heavy-duty trucks.

Venta-lators

Made of smoke tinted acrylic, Belmor's aerodynamic Venta-lators not only cover the top of an open window but fully extend down the vent pillar. So you can let fresh air in but keep rain and snow out, reducing window fog and lowering interior temperatures when parked.

Ventshades

Installed above side windows, Ventshades allow fresh air into the cab while keeping rain out. They allow windows to stay open even during bad weather, helping drivers stay alert and preventing windows from fogging. With their stainless steel design, they're as attractive as they are functional.

Get the solution to stale cab air. Go to www.belmor.com or call Belmor Customer Service at 1-800-423-1855 for more information on Venta-lators, Ventshades, and other fine Belmor products.

Belmor Venta-lators and Ventshades are available for the most popular makes and models of heavy-duty trucks including:
